# Flip & Find

To prepare this activity print and laminate the Flip and Find activity mat. Print, cut-apart, and laminate the number cards.

There is a small hole in the upper left corner of each card. You can punch a hole and put the cards on a metal ring for organization and easy storage.

If you're putting the cards on a metal ring, you'll want to mix them up first. That way students are not finding the numbers in order.

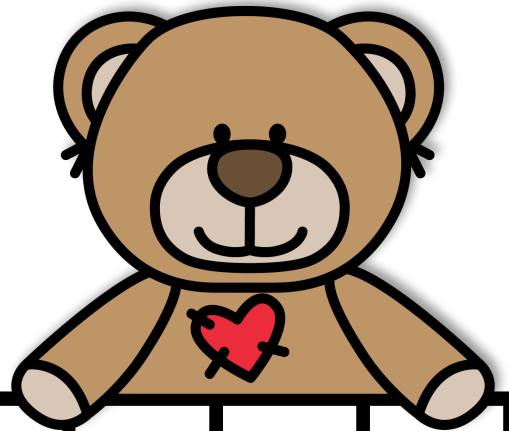

Students will also need plastic math cubes or mini erasers for this activity.

Students will identify the number. They will find and cover the corresponding number on the hundreds chart. Students will continue playing until all of the numbers have been covered.
