

# Alphabet Books Mini Readers

Mm is for monkey.

Mm is for milk.

My Letter Book:

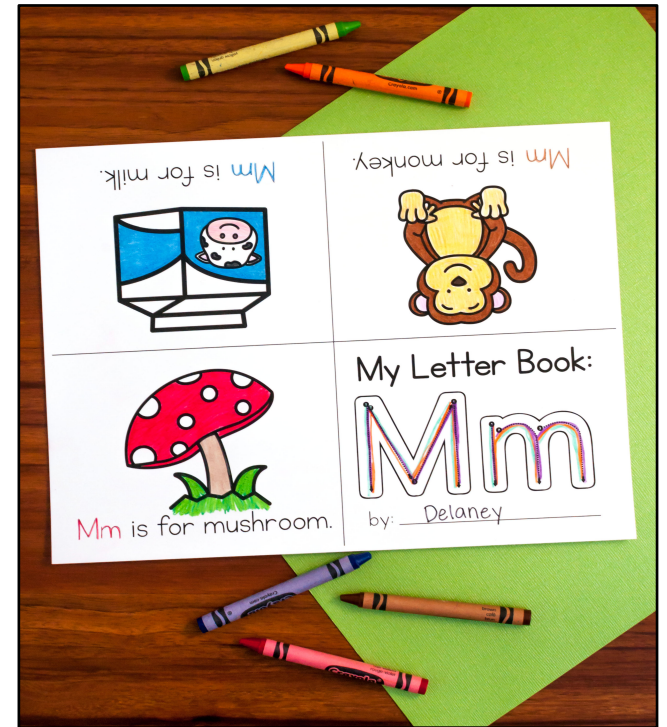

by: Melissa

# About this resource...

This resource includes 31 alphabet mini readers. There are 21 consonant and 10 vowel books. Separate short vowel and long vowel books are included. These alphabet books feature a predictable text which will help developing readers feel successful. They are perfect to have students take home and share with their families.

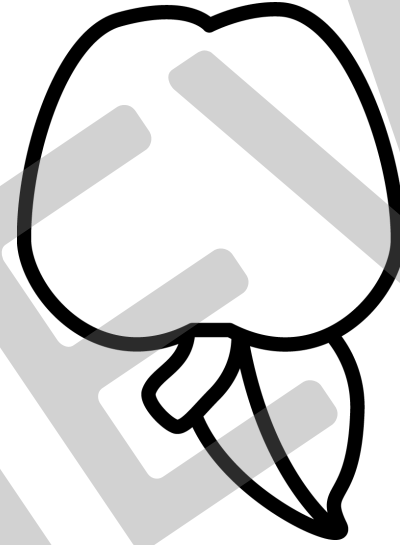

Students will fold the books in half, long ways (I call this a hotdog fold because the paper is long, like a hotdog). Next they will fold the paper in half again (I call this the hamburger fold). There are lines on the books to help students with folding.

Students can trace or rainbow write the letters on the front cover. On the inside pages, students will trace the letters and then color the pictures in their books. You can also have students use a yellow crayon or highlighter to show the letter at the beginning of the picture name.

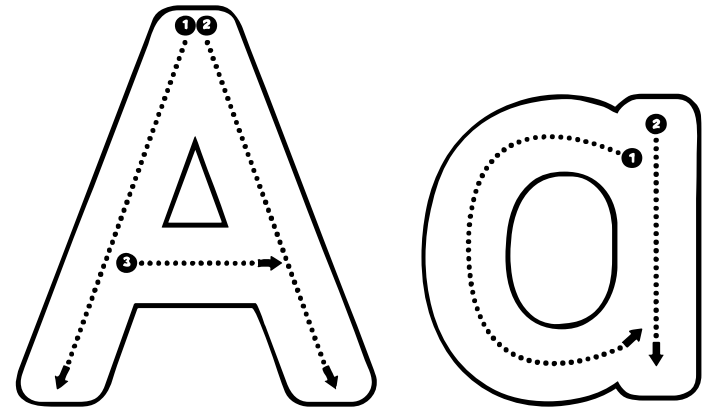

Aa is for apple.
