TEACHER REVIEWS

"My students were engaged the entire time and liked that they had to help them count. These activities are engaging and worked great for building number sense."

-Lindsey H.

"My students love doing count and builds. I love all of the different ways this resource represents numbers. This is a great resource that we will use throughout the year."

"This was a low-prep activity for me and highly engaging for my students. It works well for morning or small group work at any part of the day. I also used it to compliment our math curriculum small group work."
