

# Alphabet Activities

## Cut & Paste Letter Books

# About this resource...

This resource includes 26 alphabet beginning sound books. All books are in black and white for easy printing. These books were designed to help students become familiar with alphabet letters, letter sounds, and words that begin with the target letter. They are great to have students take home and share with their families.

Each book is two pages. Students will need one copy of each page to put their book together. Students will color the pictures and then cut on the dotted line to separate the book and letters. They will cut the books out on the black line. They will cut the uppercase and lowercase letters out and glue them in the book in the space provided. Finally, the books will be stapled to bind the pages together.

Students can take turns reading their books to their classmates. You can have students use a yellow crayon to highlight the target letter in the words.

**Please Note:** The letter Xx book is the only book that includes pictures that END with the target letter.
