About this resource...

This resource includes 28 premade Read and Cover Sight Word mats. Mats are divided by Pre-Primer, Primer, and First Grade. Premade mats begin on page 25.

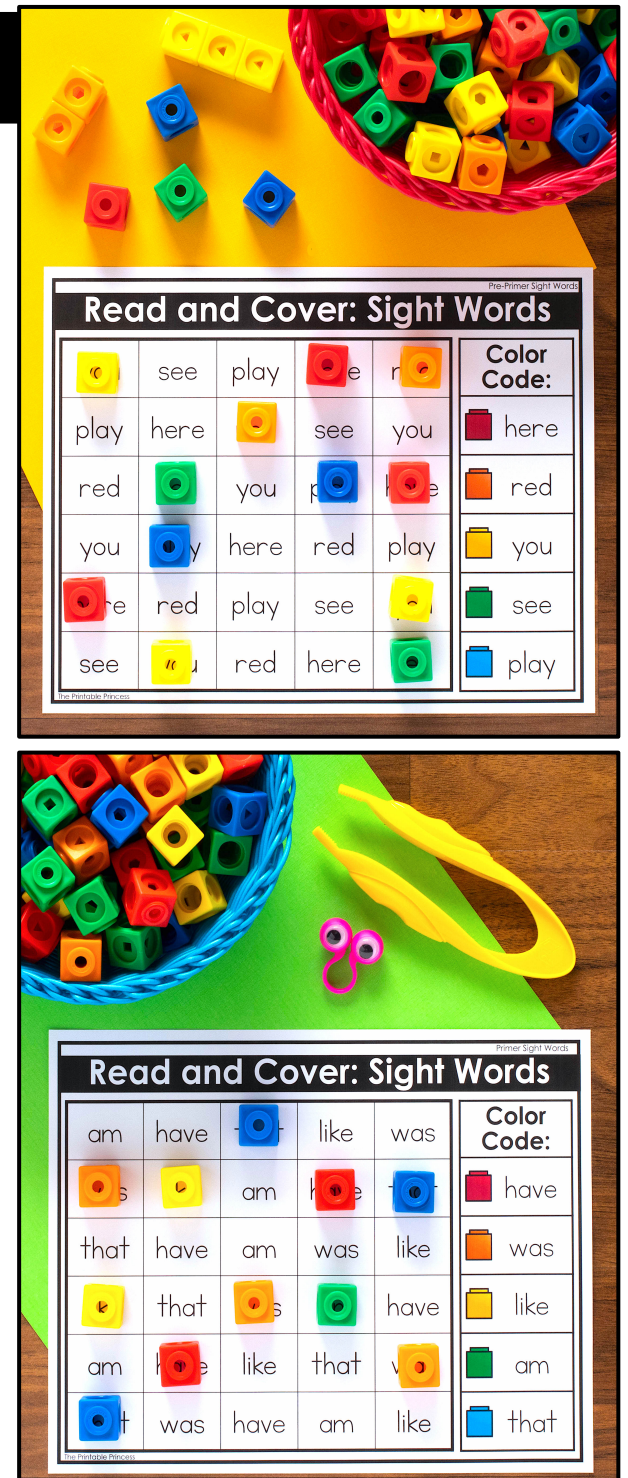

Editable mats are also included – allowing you to choose three, four, five, or six words. There are 5 mats included for each version so that students don't get used to where the sight words are located.

To edit, simply type your sight words in the color code and they will auto populate on the activity mat. To make additional mats, delete the words on the color code and type in the new words.

Important: To edit this activity you will need to open the file in Adobe. You will NOT be able to edit the activity if you are using your web browser to view the file.

To prepare this packet, just print the activity mats and laminate or slide in page protectors. Students will need red, orange, yellow, green, and blue plastic linking cubes to complete this activity.

Students will read the sight words on the right side of the activity mat. They will use the color code to read and cover the sight words on the mat.
