About this Resource...

This resource was designed to be a fun, hands-on way for students to practice sight words. It makes a great independent activity or partner activity.

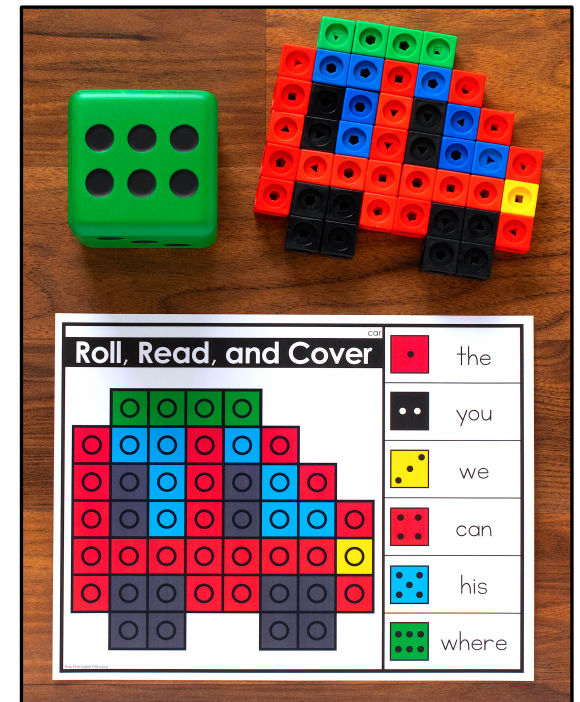

There are a total of 30 mats included. All pictures are year-round themed, so they can be used any time. The picture name for each activity mat is located in the upper right corner.

The mats are easy to prep. Just use the table of contents to click on the mat you'd like, type in the sight words, and print. You'll want to print these on cardstock and laminate for durability (or slide in a page protector). Also included is an "I Can" visual directions page. Students will need a dot cube and coordinating cube colors.

No recording sheets are needed so students can use these as morning tub activities, centers, early finishers, indoor recess, or just for fun.

Important: To edit this activity you will need to open the file in Adobe. You will NOT be able to edit the activity if you are using your web browser to view the file.

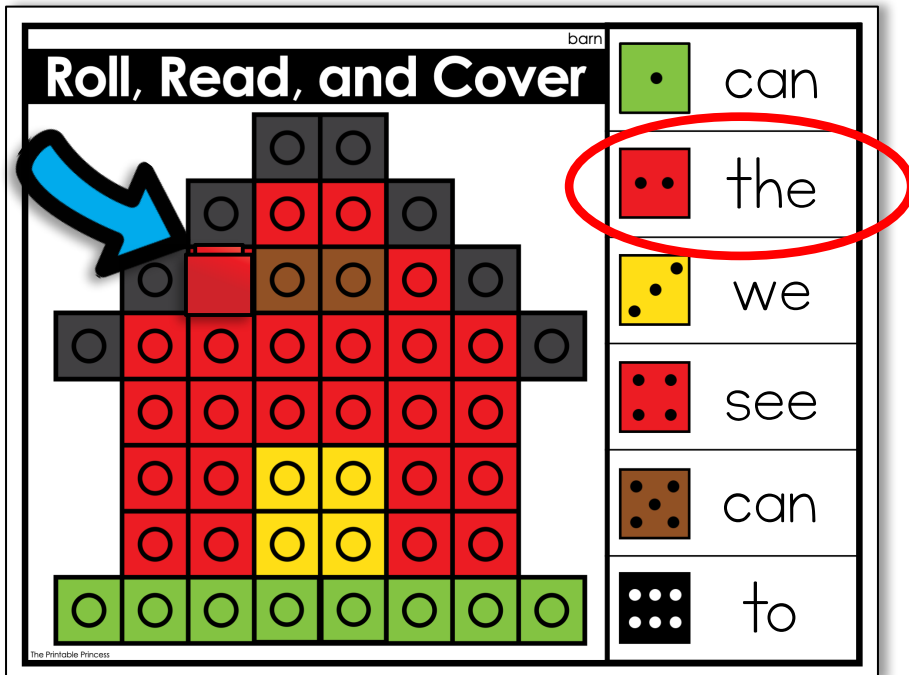

For each mat, select up to six sight words and type one sight word per box on the game mat. Students roll the dot cube and read the corresponding sight word. They will use the color code next to the sight word to color a space on their mat. Once they have covered all of the spaces, they can put the cubes together to form the picture.

Roll, Read, and Cover

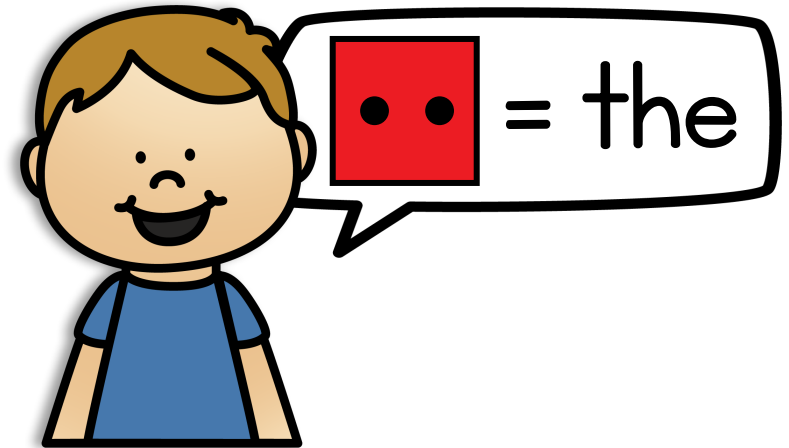

Prep Directions: Type the sight words you want to use. Print and laminate the activity mats. Students will need a dot cube and color corresponding plastic cubes.

Activity Directions: Students will roll a dot cube and read the corresponding sight word on the mat. They will cover a space on the activity mat to match the color. They will continue to play until all of the spaces are covered. You could use this as a partner game. Students take turns and the first player to complete their picture wins.

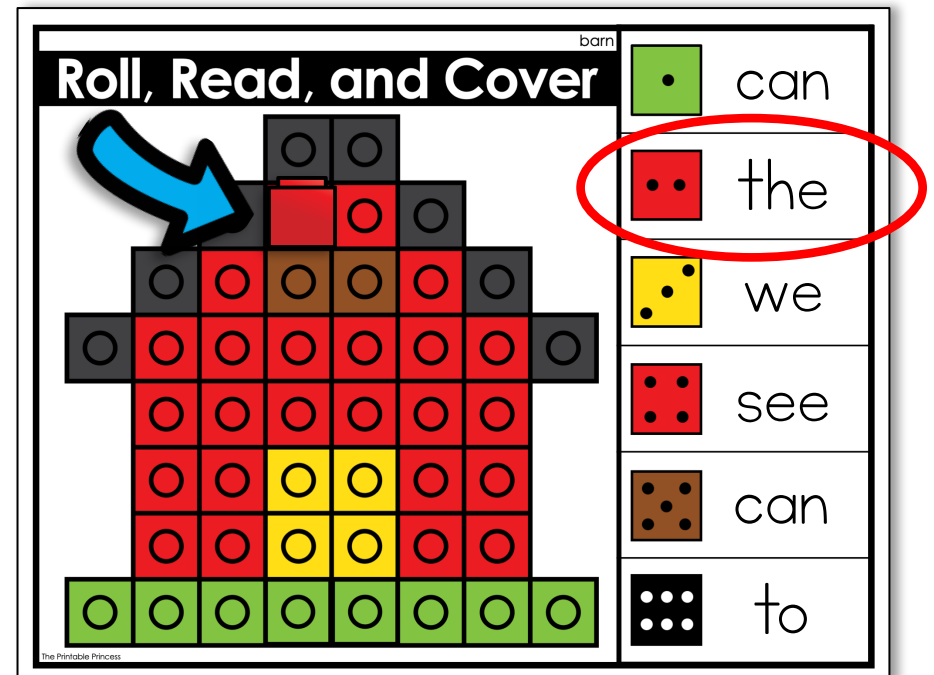

I Can...

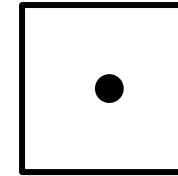

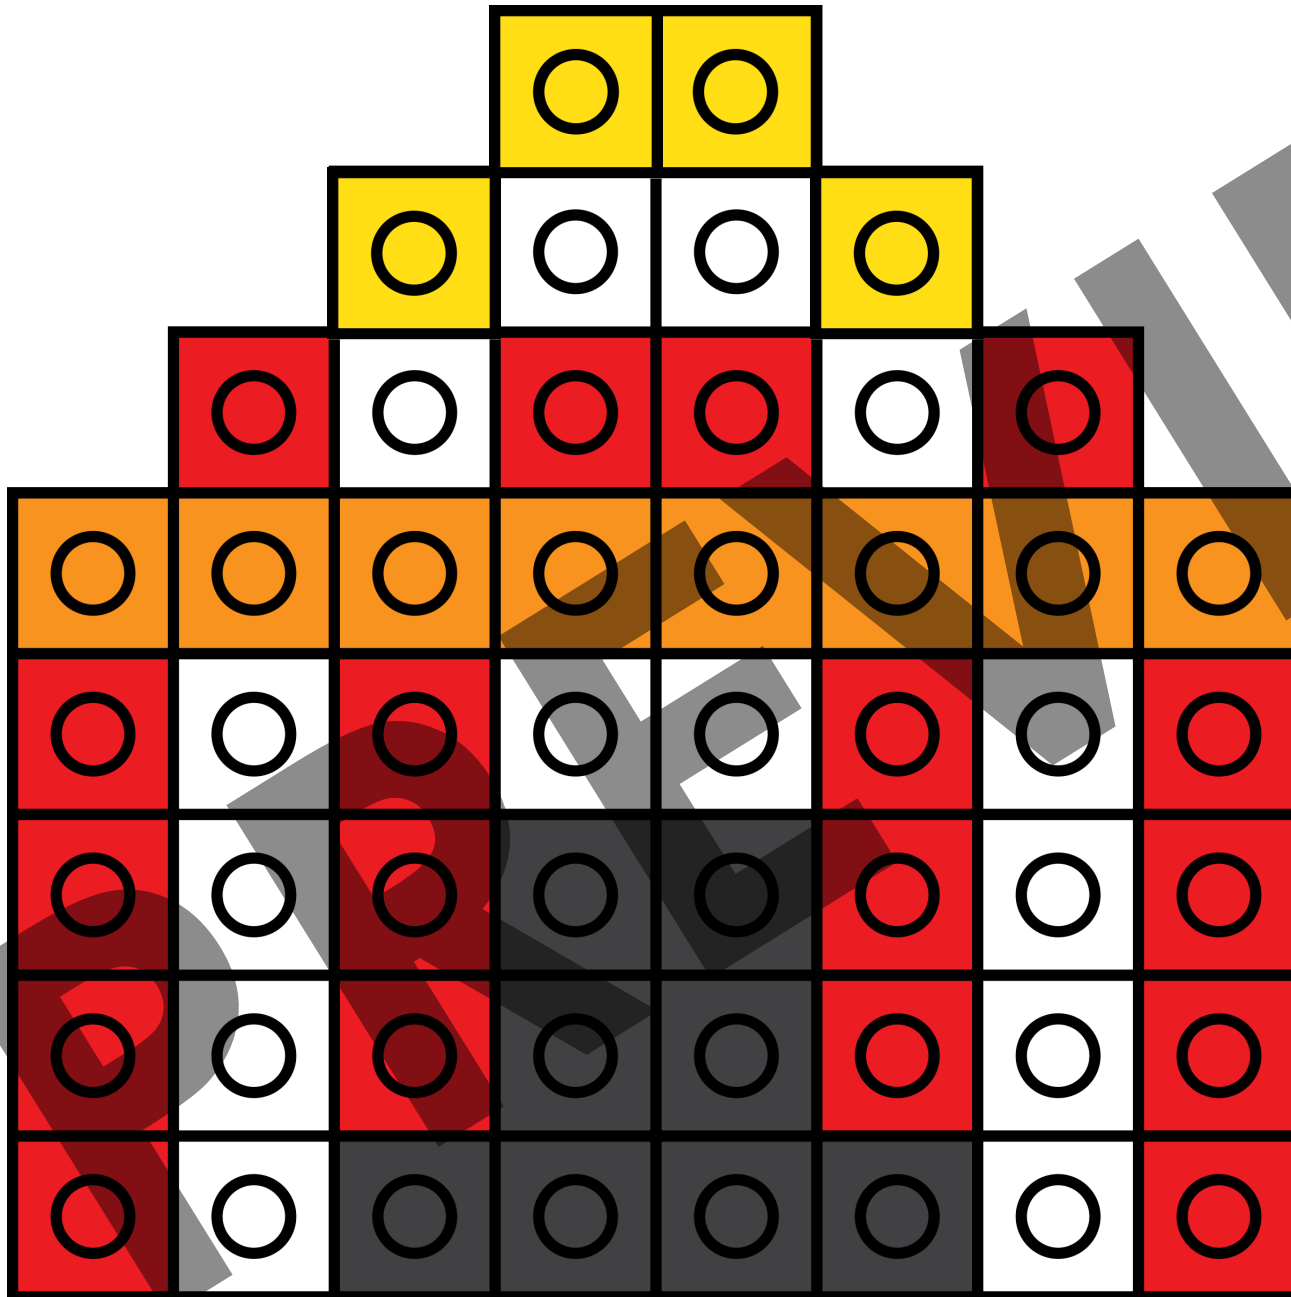

1. Roll the dot cube and read the sight word.

2. Cover a space on the activity mat to match the color.
