

SOLVE AND MATCH

ADDITION & SUBTRACTION

About this resource...

Each theme includes:

- Numbers 0-10 sorting mats
- 0-10 addition and subtraction cards
- 3 optional recording sheets (addition, subtraction, and mixed practice)

To prepare each theme print, laminate, and cut apart sorting mats and addition/subtraction cards. You can choose to use only addition cards or only subtraction cards. You can focus on only a few numbers. For example you might focus on 0-5 and combine addition and subtraction cards. If combining addition and subtraction cards, it is recommended that you only use a few number sorting mats at one time.

Students will count the objects on the cards and match it to the corresponding number card. Recording sheets are included to hold students accountable. For a different activity, students can turn the cards over and play a memory matching game. This activity also works great in a pocket chart!
