Let's Make 10: 2 (with bears)	<u>46 - 52</u>
Blank Mats for Making 5 and 10	<u>53 - 64</u>

About this resource...

This resource was designed to be an easy to prep, easy to implement activity to help your students practice making five and ten. It uses basic classroom manipulatives (plastic math cubes and plastic math bears) which students are already familiar with using.

There are 8 different types of practice mats with corresponding recording sheets and "I Can" visual directions. Also included, at the end of the packet, are blank five and ten frames for guided practice.

These would be great activities for a teacher-led, small group lesson before moving them into an independent student-led center. Since the activities do not require a recording sheet they would also be great for a morning tub or fast finisher activity.

I Can...

1. Use manipulatives to make five.

2. Show how I made five on the recording sheet.

The Printable Princess

I Can...

1. Use manipulatives to make five.

2. Write an equation equal to five.

3. Show how I made five on the recording sheet.

The Printable Princess

I Can...

1. Use manipulatives to make five.
2. Show how I made five on the recording sheet.
